CITY Fairfax STATE VA ZIP 22031

PHONE 703-698-9064 work (cell / home / work) circle one eMAIL mshade@dewberry.com

As the above-named applicant, I do hereby make an application for a Certificate of Appropriateness as required by the Leesburg Zoning Ordinance for the property located at 112 Edwards Ferry Road MCPI/PIN (parcel identification no.) 231-38-8886 to permit the following, checking all that apply:

Application Fee (Highest fee will apply if more than one fee applies):

- Alterations to an existing (primary / accessory) structure — \$25
Addition to an existing (primary / accessory) structure — \$100 / \$25
New construction of a (primary / accessory) structure — \$500 / \$50
[X] Demolition or relocation of an existing (primary / accessory) structure — \$50
Installation of a sign — \$10 (sign permit fees are additional-see zoning dept.)
Comprehensive Sign Plan — \$25 (sign permit fees are additional-see zoning dept.)
Other (fencing, paving, color, etc.)

Please mark accompanying checklist with relevant and required items, noting there is a 3-day acceptance period upon receipt of application and materials.

Briefly describe the project overall in the lines below with supplemental information required from the checklist as attachments:

Demolition of 112 Edwards Ferry Road in order to build a new 92,000 gross square feet General District Courthouse for Loudoun County and its accompanying infrastructure.

Please check one of the following:

- [X] Written permission from the owner of the property is attached hereto (application WILL NOT be accepted without documentation of property owner approval); or
I hereby certify that I am the owner of the property involved.

Applicant's Signature Marlene Walli Shade Date 11.17.14

Re: BAR submittal of 106, 108, 110, 112 Edwards Ferry Road for Demolition Approval

Dear Mr. Scofield:

Dewberry respectfully submits the four existing houses noted above for Board of Architectural Review and permission for demolition. We have conducted the applicable investigations, review of properties and present this information for your review. All of these are currently designated contributing structures, are structurally sound and are within the footprint of the proposed New District Courthouse and its supporting infrastructure.

Over many years, the community has discussed the location of this new courthouse and its impact on the preservation of the downtown core of the Town of Leesburg and its economic success. Although a far simpler solution would have been to move the courthouse campus to a suburban location we have chosen to remain in our historic civic location and to expand in place. This expansion is occurring on a small and irregular site. Through careful planning and programming we have reached a required program space of 92,000 gross square feet. After exploring 13 possible layouts of this square footage in a three story structure three possible solutions, all impacting the four houses, were chosen as the most functional. These were developed to include site infrastructure, utilizes and compliance with the very new and stringent storm water management requirements implemented by the State of Virginia this year.

We are currently only submitting the four houses for review. While contributing structures, these four houses have been significantly altered with very little original or historic materials remaining. We have documented this in attached materials. Much of this work was done prior to the County's purchase of these properties. Their value lies in the context they create along the street. We explored relocation but their value in another location due to their condition makes that a poor solution and could never replicate the context in which they currently exist. All buildings will be fully documented prior to demolition.

Preliminary design for the new courthouse is included but this building is not developed far enough to include a final package. We expect to submit a full package for the New District Courthouse early in 2015. It is our intent to submit the 1980's addition to the Valley Bank for demolition at that time as well. This project will represent the natural growth and evolution of the Courts Campus. Our new structure will act to frame and highlight the more historic structures on the campus; the second oldest bank in the Country-the 1820 Valley Bank, the 1895 Historic Courthouse and the 1844/1873 Academy Building along with the 1955 "clone."

We are currently exploring the landscape design of the public space which will be created along Edwards Ferry Road by the placement of the New District Courthouse to align with the existing courts campus. It is our intent to acknowledge the former location of these houses with icons in the landscape and historical markers. We will also have on display in the completed courthouse appropriate artifacts that were found during the archeological investigation.

The new building, being designed with input from all sectors of the community, will represent the future of Justice in Loudoun County and will take the Courts into 2025.

Sincerely,
Marlene Walli Shade AIA
Associate Principal

**Re: Loudoun County Courts Phase III Expansion Project
Board of Architectural Review Applications for
106, 108, 110 and 112 Edwards Ferry Road**

October 20, 2014

Ms. Shade:

As an authorized agent of the Loudoun County Board of Supervisors, owner of the above properties located on parcel 231-38-8886, I authorize Dewberry Architects, Inc. to submit applications associated with the Courts Phase III Expansion project. Dewberry Architects Inc. will serve as the "Applicant" on these related applications on behalf of the County.

Please contact Melissa Tello at Melissa.Tello@loudoun.gov or (703) 737-8054 with any questions.

Sincerely,

Joe Kroboth, III
Director

Loudoun County Courts Expansion

11.17.2014

Application for the removal of 112 Edwards Ferry Road.
DHR ID 253-0035-0494

Background

Loudoun County is requesting the demolition of the structure located at 112 Edwards Ferry Road to accommodate the expansion of the County Courthouse onto the Church Street lot. Over many years, the County and the Town have discussed the expansion of the current Courthouse complex to include the property bounded by Church Street, Edwards Ferry Road and the historic cemetery. Four historic structures currently exist on this property. The Town has stressed that maintaining the presence of the County Courthouse in its current location is vital to the growth and enhancement of a healthy, historic downtown. The County concurs that the larger preservation issue at hand, is the continued relevance of the historic downtown as a hub for civic, commercial, and residential activity. The expansion of the Courts complex is integral to this overarching preservation goal.

The expansion of the Courthouse complex necessitates the use of the property addressed in this application, raising the issue of the maintenance or removal of the structure located at 112 Edwards Ferry Road. The County understands that the property, and the historic structures on the property, are contributing elements to the Leesburg Old and Historic District and are thus part of the historic fabric of downtown Leesburg. The County has evaluated alternatives to demolition as part of the design of the expanded Courthouse complex. However the preservation of this structure is not possible given the requirements for the new construction associated with the expansion.

After careful analysis of possible layouts for the new courthouse the architects developed thirteen possible layouts for this courthouse. Each was driven by the minimum size of a District Courtroom in the Commonwealth of Virginia. That is 1800 square feet clear inside the Courtroom. Functional requirements drive the width and length of the courtroom. This and the adjacent requirement for in-custody defendants and both secure and public circulation paths determine the width and length of the courtroom block. Design options are greatly hampered by the overall size of this lot and the "L" shape configuration of the lot itself. Of these thirteen concepts, all of which required an overlap of the houses in question, seven were presented to the County and vetted through a consensus process with the County and Users. Five concepts were deemed acceptable for further development and were. These five were studied for appropriate building form, setback, orientation, massing and complexity of form, spacing as well as height, width, scale and directional expression, all considerations of the

Leesburg Old and Historic Design Guidelines. Through public meetings, meetings with the Town of Leesburg and further user input the five concepts were reduced to two. These are presented in this application along with materials related to the four houses themselves.

Consideration of the elements noted above all led to the two preferred final designs. This includes a footprint that provides the required 92,000 gross square feet on three floors which overlaps the four Edwards Ferry Road houses, in particular 112 Edwards Ferry Road. Due to the confines of the site, construction could not occur without some disruption beyond the footing shown-ten to fifteen feet to a minimum, which further encroaches on the structure. A cemetery to the north and existing storm water management structure to the east will direct the cranes required for this construction to Church Street or Edwards Ferry Road. The general topography of the site (which slopes approximately 18 feet from the southwest corner to the northeast corner) will require two separate storm water management solution areas (one to the north and one to the south) to meet the new Commonwealth of Virginia requirements. One SWM structure will be located to the north of the new building and two to the south. The southern solution, due to limited site area will be concrete underground sand filter structures, one of which by necessity is located directly below the structure in question. In addition to their size, these require access for yearly maintenance. Existing utility connections are shown on accompanying exhibits and will disrupt the site to the south of the new building and further impact these four houses.

112 Edwards Ferry Road

The subject structure is contributing to the historic district. However, the structure has been significantly altered, with very little original or historic materials remaining and, based on current documentation it is unlikely that this structure would be eligible for individual listing in the National Register of Historic Places. Included at the conclusion of this narrative is a synopsis of the structure inclusive of remaining historic features, alterations and replacement materials.

The viability of this structure to support continued County functions is extremely limited to non-existent due to the security issues associated with contemporary court facilities. Given the importance of retaining the courts complex in downtown, historic Leesburg, relative to the historic significance of the subject structure, the County proposes to demolish the structure at 112 Edwards Ferry Road to allow for the construction of the new courthouse, retaining the important civic presence of the courts in their current setting which is foundational to the vitality of the historic district. The increased activity in and around the proposed courthouse will support the continued vibrancy of the downtown and potentially support reinvestment in the surrounding historic properties. The expansion of the civic presence of the courts to the east will transform what is currently an underutilized property into a civic center that will support the civic core of downtown Leesburg, thereby preserving over 230 years of the presence of the Courts in the center of the town of Leesburg.

Preservation and Mitigation Strategies

Historic preservation can take many forms and there are various strategies that can be used to mitigate the loss of a historic structure. Relocation is often suggested as a means of preserving a historic structure. Relocation may be appropriate in limited cases, particularly when a structure historically significant enough to be individually eligible for the National Register. Relocation of the subject structures which are only significant in the context of the larger historic district is not a viable preservation strategy. The County is committed to preserving archivally the structures on the subject property through the completion of an intensive level architectural survey meeting Virginia Department of Historic Resources' standards and archaeological investigation of the property. The County is further committed to working with the Town to creatively incorporate and interpret the history of the subject structures as part of the development of the new courthouse in a way that is dynamic and relevant to the public at large. The courts complex is an ideal venue for public interpretation, appreciation and engagement in our shared history. Such efforts could include outline tracings of the footprints of the subject structures on the property, or selective demolition to salvage specific architectural elements that can be repurposed to create hardscape features, public sculpture, etc.

New Courthouse Construction

Preliminary, conceptual design for the new courthouse is included with this application for the BAR's reference. However, the new construction is not a part of the current application. The County expects to submit a full package for the New District Courthouse early in 2015.

The courthouse expansion and associated site improvements will represent the natural growth and evolution of the Courts Campus within the Town of Leesburg. Our new structure will act to frame and highlight the highly historic structures on the campus; the second oldest bank in the Country-the 1820 Valley Bank, the 1895 Historic Courthouse and the 1844/1873 Academy Building along with the 1955 "clone."

We are currently exploring the landscape design of the public space which will be created along Edwards Ferry Road by the placement of the New District Courthouse. It is proposed that this new green space will align with the existing open space on the current courts campus which fronts on Market Street. Again, it is our intent to acknowledge the former location of the structure at 112 Edwards Ferry Road in some manner. We will also have on display in the completed courthouse appropriate artifacts that were found during the archeological investigation. The new building, being designed with input from all sectors of the community, will represent the future of justice in Loudoun County and will take the Courts into 2025, while supporting the continued vibrancy of historic Leesburg, VA.

Structure at 112 Edwards Ferry Road

DHR ID 253-0035-0494

The original footprint ca. 1820, was the one-story building. By 1899, a frame 2-story was added to the brick portion, and a 1-story rear ell. The rear ell was expanded to 2-stories between 1912 and 1930. The 2-story porch was added between 1982 and 1988.

Not Historic- Windows, siding, gable vents, shutters, doors, door frames, cornice trim, rear porch, rear concrete slab.

Historic- Gable windows original, most of brick original, window frames, water table between first and second floor. Roofing may be historic.

Site: This building stands along the northern side of Edwards Ferry Road in the Town of Leesburg. It abuts the concrete sidewalk along the street. To the east and west are other former buildings. A board fence is found north of the house along an asphalt-paved parking lot. A level lawn is found immediately east, west, and north of the house.

Exterior: This two-story former dwelling stands on a brick foundation. The core of the building measures four bays wide and one bay deep with a four-bay deep gabled rear ell. The side-gabled roof is covered with standing seam metal and features partial cornice returns. The first floor of the core is six-course common bond brick while the remainder of the building, the second floor of the core and the rear ell, are of frame clad with German siding. A two-story tall, wooden porch with square wooden posts and matchstick railing is found between the north wall of the core and the rear ell. The main entry is in the second-from-the-west bay of the façade. The windows are two-over-two, double-hung sash, having stone sills and flat brick arches on the first floor, and simple board trim in the remainder of the building. There are three corbelled cap brick chimneys in this building, one at each gable end of the core and the other in the center of the rear ell.

**INTENSIVE ARCHITECTURAL SURVEY OF
106, 108, 110, AND 112 EDWARDS FERRY ROAD
TOWN OF LEESBURG
LOUDOUN COUNTY, VIRGINIA**

**MANAGEMENT SUMMARY – FINAL
NOVEMBER 5, 2014**

At the behest of Loudoun County, JMA (John Milner Associates, Inc.) conducted an Intensive Architectural Survey of four buildings in the Town of Leesburg: 106, 108, 110, and 112 Edwards Ferry Road (Figures 1 and 2). The purpose of the investigation was to document the interior and exterior of these historic architectural resources. The survey was designed to comply with the Virginia Department of Historic Resources (VDHR) *Guidelines for Conducting Cultural Resource Survey in Virginia* (VDHR 2011) and the Secretary of the Interior's *Standards and Guidelines for Archaeology and Historic Preservation*. The study included limited historic background research on the history of the project area and its vicinity as well as detailed map and deed research for each contributing resource. The field investigation was conducted on 4 March and 3 April 2014.

Field methods included field survey and investigation with digital photography of the four resources. Site plans, floor plans, photographic prints, and an intensive DSS form were prepared for each resource.

The four buildings documented are all contributing resources to the Leesburg Historic District (DHR ID 253-0035). They have the following DHR IDs: 106 Edwards Ferry Road (253-0035-0491), 108 Edwards Ferry Road (253-0035-0492), 110 Edwards Ferry Road (253-0035-0493), and 112 Edwards Ferry Road (253-0035-0494). There is no recorded individual determination of eligibility for any of these buildings. The Leesburg Historic District is significant for its architecture and community planning/development for the period 1757 – 1950 (Weidlich, McDonald, and Trieschmann 2001 8:81). These four buildings are close to the center of town where the historic district is comprised of tightly packed governmental, commercial, and residential buildings. They were all built as dwellings and converted to county offices in 1980 when purchased by Loudoun County from the Slack family.

Table of Resources

VDHR ID	Address	Property description	VLR / NRHP status
253-0035-0491	House 106 Edwards Ferry Road	This is a two-story tall, frame vernacular building, that was built as a dwelling, later served as offices, and is now vacant. The interior, especially the first floor, has been altered from its original plan to accommodate office uses. It has a side-gable roof with gabled rear ell. The exterior is German siding, likely replaced in kind since the building was built around 1880. There are changes to the fenestration pattern on the west elevation, modern replacement windows, and modern railing on the front stoop.	Contributing resource to Leesburg Historic District (253-0035)
253-0035-0492	House 108 Edwards Ferry Road	This is a two-story tall, frame vernacular building that was built as a dwelling, and is used for storage. The first floor plan of the first floor has been slightly modified to accommodate its current use. The gable-front building has a full-width, hipped roof porch with turned posts, and a one-story, shed-roof, kitchen ell. The windows are modern replacements. The exterior is covered with weatherboard, likely replaced in kind after the building's construction ca. 1873.	Contributing resource to Leesburg Historic District (253-0035)
253-0035-0493	Slack House 110 Edwards Ferry Road	This is a mid-nineteenth century, two-story tall, frame vernacular building that was built as a dwelling and now houses county offices. It has two portions: a 2-story tall, 2-bay wide side-gable section built ca. 1860, and a 2-story tall, center-gable section expanded from 1 story tall ca. 1910 that has a full-width porch with turned posts and scroll-sawn brackets. The shed roof extension from the side-gabled wing was added between 1986 and 1988. The exterior is covered with German siding and weatherboard, likely replaced in kind since the building was built around 1860. The windows and doors are modern replacements but the fenestration pattern is unchanged.	Contributing resource to Leesburg Historic District (253-0035)
253-0035-0494	House 112 Edwards Ferry Road	The brick first floor of this building dates from the early nineteenth century with the frame second story and two-story tall, gabled rear ell added in the late nineteenth century. It was built as a residence and currently serves as county offices. It has a side-gable roof with a frame, gabled rear ell. A two-story shed roof porch, built ca. 1982-1988, is found along the rear ell. The brick is common bond with flat arches over the windows and doors. The frame portion is clad with German siding, likely replaced in kind since originally built.	Contributing resource to Leesburg Historic District (253-0035)

ARCHITECTURAL DESCRIPTION

Site

This building stands along the northern side of Edwards Ferry Road in the Town of Leesburg. It abuts the concrete sidewalk along the street. To the east and west are other former dwellings. A board fence is found north of the house along an asphalt-paved parking lot. A level lawn is found immediately east, west, and north of the house.

Exterior

This two-story former dwelling stands on a brick foundation. The core of the building measures four bays wide and one bay deep with a four-bay deep gabled rear ell. The side-gabled roof is covered with standing seam metal and features partial cornice returns. The first floor of the core is six-course common bond brick while the remainder of the building, the second floor of the core and the rear ell, are of frame clad with German siding. A two-story tall, wooden porch with square wooden posts and matchstick railing is found between the north wall of the core and the rear ell. The main entry is in the second-from-the-west bay of the façade. The windows are replacement double-hung sash with two-over-two grids. The windows in the brick section of the building have stone sills and flat brick arches, with simple board trim around the windows in the remainder of the building. There are three corbelled cap brick chimneys in this building, one at each gable end of the core and the other in the center of the rear ell.

Interior

First floor

This building has a center hall plan with a central stair. The floor plan has been slightly modified to accommodate its current use as county offices. The interior finishes for most of the building, except for the bathrooms, are carpeted floors and painted walls.

The front door opens into the central hall, with an open stair. The stair features a turned balustrade and heavy, turned newel post. East of the hall is the former living room, now an office. This room has a fireplace with a simple mantel with grooved pilasters. West of the central hall is a small office. The hallway leads into the former dining room, now a conference room. At the south end of this room is a half bath. This room has an exterior door onto the side porch and features tongue-and-groove wainscoting. North of the dining room is a kitchen with U-plan cabinets and closets filled with filing cabinets. It also has an exterior door leading to the side porch.

Second floor

The stair from the first floor ends at a small landing which connects to a hallway along the east side of the rear ell. Along the south end of the building, reached via the stair landing, are two offices, one at the southeast and the other at the southwest corners. A half bath is found along the west wall of the core. Off the hallway in the rear ell are two

additional offices. The northernmost office also has a half bath. Access to the second-story porch is from the stair landing and the rear ell's hallway.

OWNERSHIP/USE HISTORY

The earliest deed found for the parcel including this building is from the December 1813 sale by John McCabe to William Kirk of a one-quarter-acre lot on the north side of Market Street (now Edwards Ferry Road) measuring 52.5 feet wide and 207.75 feet deep (Loudoun County Deed Book [LCDB] 2R:93). The brick core of the present building was built after this transaction and before its October 1820 sale by William Kirk to Benjamin Maulsby. This deed mentions a brick house as being on the property at that time and sold for \$800 (LCDB 3B:179). This deed also reserves for Mr. Kirk the use of the well on this lot. Mr. Maulsby did not own the property for long, conveying it to the county sheriff in June 1823 to repay his creditors (LCDB 3F:470). James Martin was the next owner of the property and he conveyed it to David Carr in October 1835 as security for his debts (LCDB 4F:177). Martin defaulted on his debt and Carr sold the property to Edwin Gover in April 1844 for \$225 (LCDB 4U:297). Edwin Gover owned the house for five years before selling it for \$362.50 to Sarah Dawson. At this time the house was described as occupied by Edwin Hart (LCDB 5B:16). The 1850 census lists Edwin Hart as an England-born, 48-year-old carpenter. Sarah Dawson then conveyed the property to Elizabeth Snyder for \$600 in May 1857. At this time the property was described as occupied by Fenelon Slack (LCDB 5O:462). This is presumed to be Fenelon Slack, a carpenter and wheelwright in Leesburg. Elizabeth Snyder willed the property to Catherine Slack, the wife of Fenelon Slack, through her 1902 will (Loudoun County Will Book 3Q:411). After Catherine Slack's death, the property passed to her children, Lloyd Slack and Sarah Dawson. Lloyd Slack was an undertaker and cabinet maker in Leesburg with a store on King Street near Loudoun Street. Later deeds refer to this house as the home of Lloyd Slack. After Lloyd Slack's death in February 1926, the property passed to his son, Lloyd Fowler Slack, and his daughter Mary Louise Hutchinson. Lloyd F. Slack had no heirs, so the property passed to his nephew and niece, Richard Hutchinson Jr. and Betty Lloyd Boland, after his death, and the death of his sister. Loudoun County purchased the property, along with other adjacent parcels owned by these Slack heirs, in 1980 (LCDB 762:734 and 773:100).

The earliest map evidence of a building on this parcel is the 1854 Yardley Taylor map of Loudoun County (Taylor 1854). Since the deeds refer to a brick house here prior to 1854 it is presumed that this map shows the brick core of the present building. Gray's map of Leesburg from 1878 provides more detail. This map shows an L-plan building footprint along the north edge of the street (then East Market Street, now Edwards Ferry Road) (Gray 1878). This map also denotes "Hough" as the property owner, even though deed records indicate that it was owned by Elizabeth Snyder at the time.

Late nineteenth and early twentieth century Sanborn maps show still more detail about the buildings on this property. The 1899 Sanborn map shows the building in its present configuration, with a brick first floor, and a frame rear ell. The same building configuration is shown on the 1903, 1907, 1912, and 1930 Sanborn maps. The two-story tall porch along the west elevation of the rear ell was added between 1982 and 1988.

APPENDIX

DATE: 11.17.2014
TO: Town of Leesburg Board of Architectural review
FROM: Marlene Walli Shade AIA
SUBJECT: Response to June 5, 2014 memo
Removal of 106, 108, 110, 112 Edwards Ferry Road

1A. Loudoun County is applying for approval of the demolition of four houses on Edwards Ferry Road adjacent to the existing Church Street on-grade parking lot. The houses are 106, 108, 110 and 112 Edwards Ferry Road. There are no scenarios for the construction of the New District Courthouse that allow the courthouse complex, including existing facilities to remain in the Town of Leesburg without removal of these houses. All of over 13 design concepts required the removal of these houses.

1B. Previous archeological investigations determined that these structures are contributing structures. Our investigations have determined similar.

1C. Most of the existing buildings are occupied and considered to retain structural Integrity. County is undergoing a feasibility study to determine the possibility of moving the structures. Our structural engineer is reviewing the integrity for move and a house mover is reviewing as well.

1D. Plans of proposed new structure are attached for review.

1E. No comment

1F. No comment

1G. A reconnaissance study is attached and the Owner has completed all required archeology until the new construction allows us to interrupt parking to do additional test pits. The Town of Leesburg previously agreed that this investigation could be split into two parts to allow required parking to be retained. We have attached a preliminary landscape plan indicating the planned disposition of the area in which the houses are now located. No demolition will occur until the permit for the New General District Courthouse is received. We will instruct the demolition contractor to salvage materials as requested. Most exterior materials are not original and all but one fireplace surround and few doors inside are still original.

1H. We will comply.

1I. No comment

Not Evaluated

This Property is associated with the Leesburg Historic District.

Additional Property Information

Architecture Setting: Town

Acreage: *No Data*

Site Description:

December 1998: This house is built right up to the street with a fenced rear yard.

April 2014: This building stands along the northern side of Edwards Ferry Road in the Town of Leesburg. It abuts the concrete sidewalk along the street. To the east and west are other former dwellings. A board fence is found north of the house along an asphalt-paved parking lot. A level lawn is found immediately east, west, and north of the house.

Surveyor Assessment:

December 1998: The street currently known as Edwards Ferry Road was historically a part of Market Street, one of the original roads of Leesburg as laid out in 1759. (Market Street now takes a Y-bend southeast of Church Street. The part east of Church Street is no longer known as Market Street since it was renamed Edwards Ferry Road in the 1970s.) This street has historically contained the town's most important public buildings, and the county jail still remains within the project area. The road is depicted on the 1853 Yardley Taylor Map of Leesburg with only a few buildings, including a jail, east of Church Street. The 1878 Gray's Map of Leesburg likewise shows only a few scattered houses along the northern side. By 1878, Market Street was also a through-way to Edwards Ferry Road, which crossed the Potomac River into Maryland approximately five miles east of Leesburg. The street contains a mix of residential architecture spanning several different periods, including at least three early-to-mid-nineteenth-century brick residences and the Johnston House/Tavern. By the late nineteenth century, the street was fully developed along its northern side and is marked by several handsome two-story frame Queen Anne and American Foursquare-style houses, several with original garages, outbuildings and fences. The south side has always been less developed, with the large Dodona Manor property dominating the east end of the street. This Federal-style building with a Vernacular addition at 112 Edwards Ferry Road is one of the oldest buildings on the street. The brick portion dates from the early 1800s. It appears on the 1853 Yardley Taylor, Gray's 1878 and the 1899-1937 Sanborn Maps of Leesburg. This building contributes to the architectural and historic character of the district in its scale, size, style and building materials.

April 2014: The earliest deed found for the parcel including this building is from the December 1813 sale by John McCabe to William Kirk of a one-quarter-acre lot on the north side of Market Street (now Edwards Ferry Road) measuring 52.5 feet wide and 207.75 feet deep (Loudoun County Deed Book [LCDB] 2R:93). The brick core of the present building was built after this transaction and before its October 1820 sale by William Kirk to Benjamin Maulsby. This deed mentions a brick house as being on the property at that time and sold for \$800 (LCDB 3B:179). This deed also reserves for Mr. Kirk the use of the well on this lot. Mr. Maulsby did not own the property for long, conveying it to the county sheriff in June 1823 to repay his creditors (LCDB 3F:470). James Martin was the next owner of the property and he conveyed it to David Carr in October 1835 as security for his debts (LCDB 4F:177). Martin defaulted on his debt and Carr sold the property to Edwin Gover in April 1844 for \$225 (LCDB 4U:297). Edwin Gover owned the house for five years before selling it for \$362.50 to Sarah Dawson. At this time the house was described as occupied by Edwin Hart (LCDB 5B:16). The 1850 census lists Edwin Hart as an England-born, 48-year-old carpenter. Sarah Dawson then conveyed the property to Elizabeth Snyder for \$600 in May 1857. At this time the property was described as occupied by Fenelon Slack (LCDB 5O:462). This is presumed to be Fenelon Slack, a carpenter and wheelwright in Leesburg. Elizabeth Snyder willed the property to Catherine Slack, the wife of Fenelon Slack, through her 1902 will (Loudoun County Will Book 3Q:411). After Catherine Slack's death, the property passed

to her children, Lloyd Slack and Sarah Dawson. Lloyd Slack was an undertaker and cabinet maker in Leesburg with a store on King Street near Loudoun Street. Later deeds refer to this house as the home of Lloyd Slack. After Lloyd Slack's death in February 1926, the property passed to his son, Lloyd Fowler Slack, and his daughter Mary Louise Hutchinson. Lloyd F. Slack had no heirs, so the property passed to his nephew and niece, Richard Hutchinson Jr. and Betty Lloyd Boland, after his death, and the death of his sister. Loudoun County purchased the property, along with other adjacent parcels owned by these Slack heirs, in 1980 (LCDB 762:734 and 773:100).

The earliest map evidence of a building on this parcel is the 1854 Yardley Taylor map of Loudoun County (Taylor 1854). Since the deeds refer to a brick house here prior to 1854 it is presumed that this map shows the brick core of the present building. Gray's map of Leesburg from 1878 provides more detail. This map shows an L-plan building footprint along the north edge of the street (then East Market Street, now Edwards Ferry Road) (Gray 1878). This map also denotes "Hough" as the property owner, even though deed records indicate that it was owned by Elizabeth Snyder at the time.

Late nineteenth and early twentieth century Sanborn maps show still more detail about the buildings on this property. The 1899 Sanborn map shows the building in its present configuration, with a brick first floor, and a frame rear ell. The same building configuration is shown on the 1903, 1907, 1912, and 1930 Sanborn maps. The two-story tall porch along the west elevation of the rear ell was added between 1982 and 1988.

The changes made to the building since it was last surveyed do not impact its status as a contributing resource to the Leesburg Historic District. It contributes to the architectural and historic character of the historic district in its scale, size, style, and building materials.

Architectural Style:	Federal/Adamesque
Form:	No Data
Number of Stories:	2.0
Condition:	Good
Interior Plan:	No Data
Threats to Resource:	Demolition, None Known

Architectural Description:

December 1998: The oldest part of this house is the 1-1/2-story, 4-bay, brick Federal-style portion dating from circa 1800. It has a Flemish bond facade with 5-course bond on the side elevations. The windows and door have brick jack arches. Around 1895, the house was raised to a full two stories with a frame second story. It has a gable roof and 2/2 sash. A substantial 4-bay, 2-story rear wing has a 2-story porch on the east.

This house is somewhat deteriorated and is now used as apartments.

April 2014:

Exterior:

This two-story former dwelling stands on a brick foundation. The core of the building measures four bays wide and one bay deep with a four-bay deep gabled rear ell. The side-gabled roof is covered with standing seam metal and features partial cornice returns. The first floor of the core is six-course common bond brick while the remainder of the building, the second floor of the core and the rear ell, are of frame clad with German siding. A two-story tall, wooden porch with square wooden posts and matchstick railing is found between the north wall of the core and the rear ell. The main entry is in the second-from-the-west bay of the facade. The windows are replacement double-hung sash with two-over-two grids. The windows in the brick section of the building have stone sills and flat brick arches, with simple board trim around the windows in the remainder of the building. There are three corbelled cap brick chimneys in this building, one at each gable end of the core and the other in the center of the rear ell.

Interior:

First floor: This building has a center hall plan with a central stair. The floor plan has been slightly modified to accommodate its current use as county offices. The interior finishes for most of the building, except for the bathrooms, are carpeted floors and painted walls.

The front door opens into the central hall, with an open stair. The stair features a turned balustrade and heavy, turned newel post. East of the hall is the former living room, now an office. This room has a fireplace with a simple mantel with grooved pilasters. West of the central hall is a small office. The hallway leads into the former dining room, now a conference room. At the south end of this room is a half bath. This room has an exterior door onto the side porch and features tongue-and-groove wainscoting. North of the dining room is a kitchen with U-plan cabinets and closets filled with filing cabinets. It also has an exterior door leading to the side porch.

Second floor: The stair from the first floor ends at a small landing which connects to a hallway along the east side of the rear ell. Along the south end of the building, reached via the stair landing, are two offices, one at the southeast and the other at the southwest corners. A half bath is found along the west wall of the core. Off the hallway in the rear ell are two additional offices. The northernmost office also has a half bath.

Access to the second-story porch is from the stair landing and the rear ell's hallway.

The changes made to the building since it was last surveyed do not impact its status as a contributing resource to the Leesburg Historic District. It contributes to the architectural and historic character of the historic district in its scale, size, style, and building materials.

Exterior Components

Component	Component Type	Material	Material Treatment
Windows	Sash, Double-Hung	Aluminum	2/2
Roof	Gable	Metal	Standing Seam

Historic District Information

Historic District Name:	Leesburg Historic District
Local Historic District Name:	<i>No Data</i>

Historic District Significance: The town of Leesburg was established in 1758 by an Act of the General Assembly of Virginia authorizing Nicholas Minor to sell lots from a sixty acre tract surrounding his tavern. The town was to serve as the county seat for the newly formed Loudoun County. A committee of three men had been appointed a year earlier to lay out "proper streets" and their report, which still exists, forms the bases for the present layout of the community. The settlement had been known as Georgetown in honor of King George II until the county was formed in 1758, and the name was changed to Leesburg in honor of Francis Lightfoot Lee. The town grew significantly during its first several decades, but expansion slowed considerably from the War Between the States to the post-World War II era. As a result, Leesburg possesses an important collection of structures dating from the late-eighteenth century through the early-nineteenth century, most of which are well maintained. Especially notable structures include the following: The Laurel Brigade Inn, an early stone tavern still in operation; Osburn's Tavern, scene of a reception for Lafayette during his visit in 1825; the "Old Tavern," an architecturally distinguished structure built in the late-eighteenth century; and the County Office Building, a dignified Greek Revival building erected circa 1844 as the Leesburg Academy. The brick Classic Revival Loudoun County Court House was completed in 1895 on the site of two previous court houses. Also located in the town is the significant site of the Old Stone Church, demolished in 1900. The lot, which was purchased by the Methodists on May 11, 1766, was the first property owned by the Methodists in America. The numerous early dwellings and commercial buildings, along with the structures cited, combine to make Leesburg one of the best preserved and most picturesque communities in Virginia. Fortunately the historic integrity and scenic quality of the town have received protection through historic zoning established in recent years.
